LAB OBSERVATION

EXPERIMENT-1

1) Use Figma to create an interactive diagram illustrating the components of a basic cellular system.

Answer)

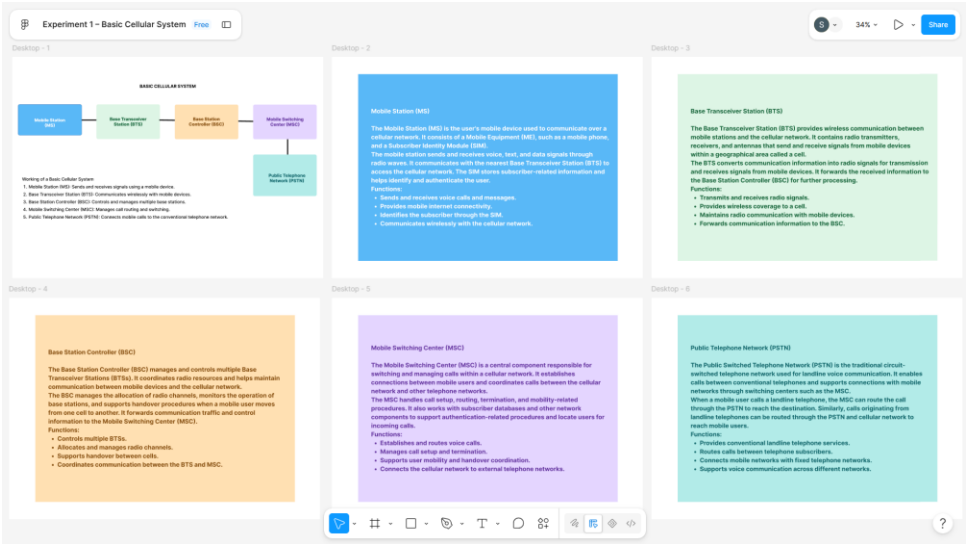

Aim:

To create an interactive diagram illustrating the components of a basic cellular system using Figma.

Procedure / Algorithm:

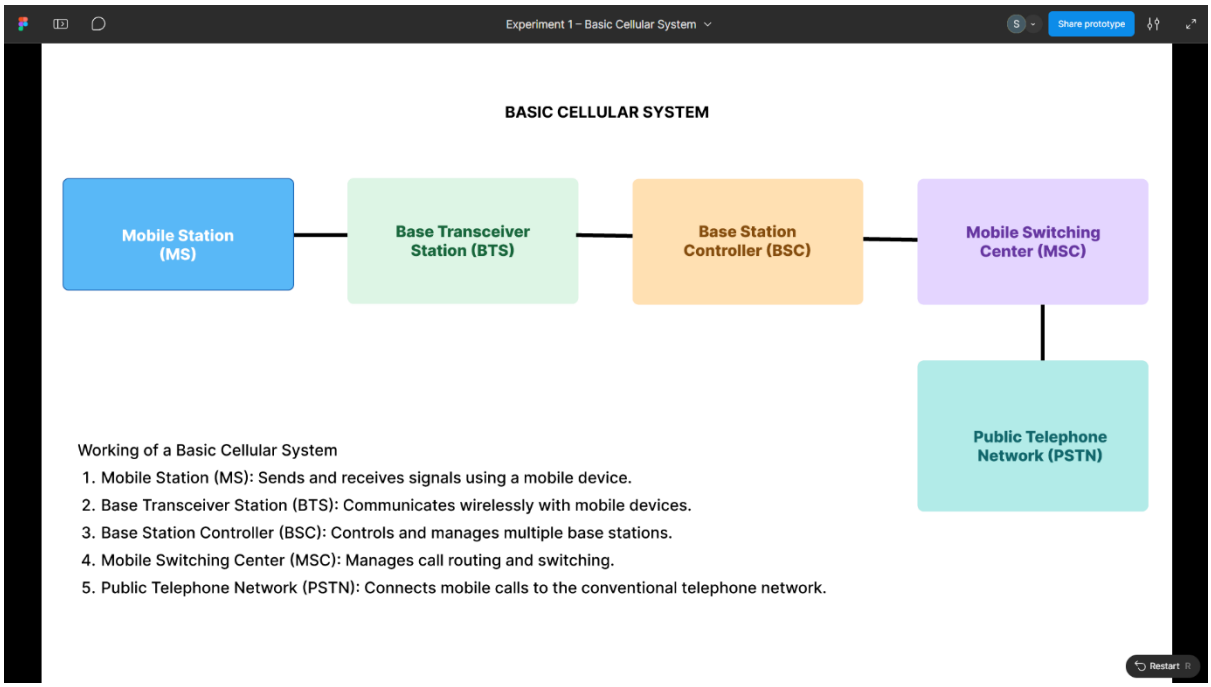

1. Open Figma and create a new design file.
2. Create a suitable frame for the cellular system diagram.
3. Add the title Basic Cellular System.
4. Draw and label the main components: Mobile Station (MS), Base Transceiver Station (BTS), Base Station Controller (BSC), Mobile Switching Center (MSC), and Public Switched Telephone Network (PSTN).
5. Arrange the components in the correct sequence.
6. Connect the components using lines to represent communication between them.
7. Add brief descriptions explaining the functions of the components.
8. Create an information overlay for the Mobile Station and connect it using Prototype mode.
9. Preview the design and verify the interaction.
10. Save the completed design.

Implementation:

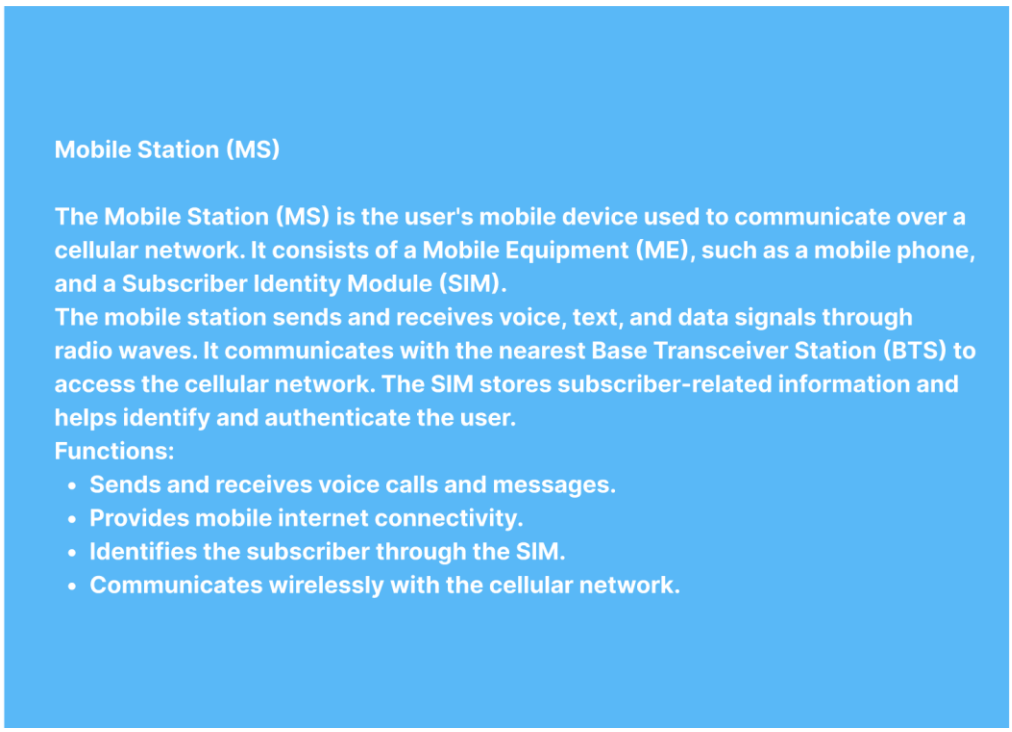

Output:

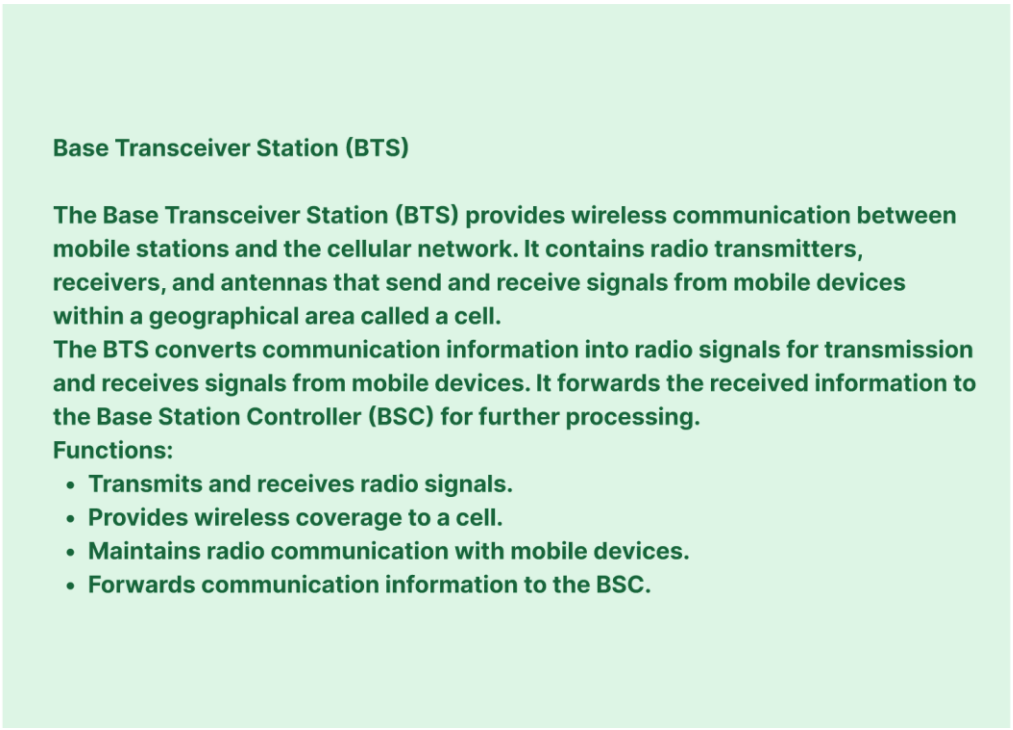

Output 1: Basic Cellular System Diagram

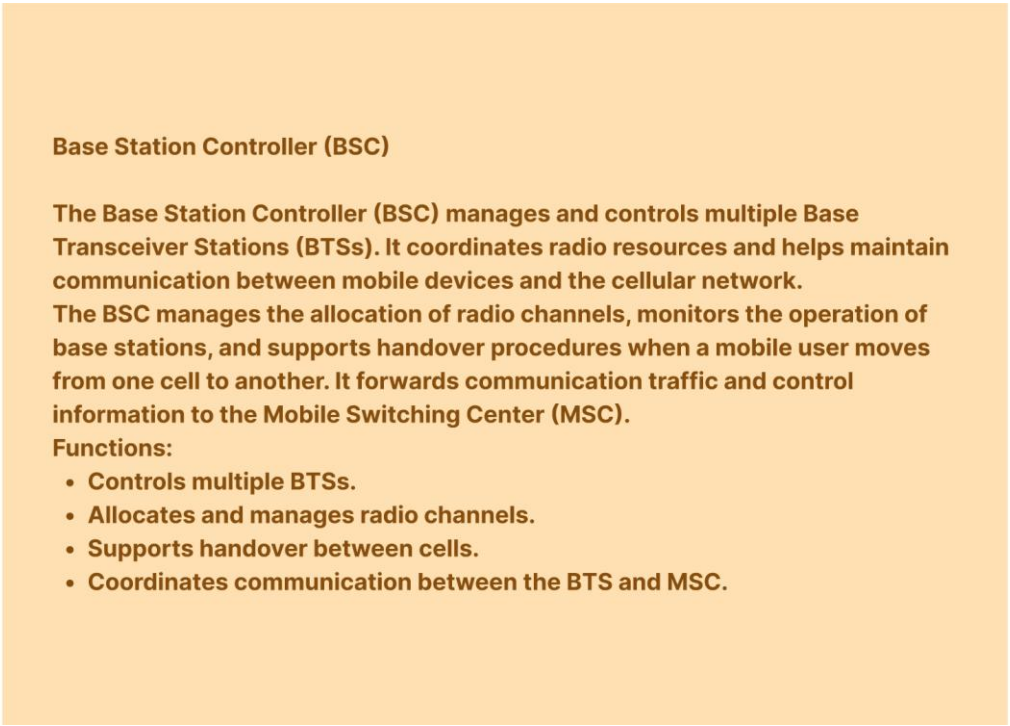

Output 2: Interactive Mobile Station Overlay

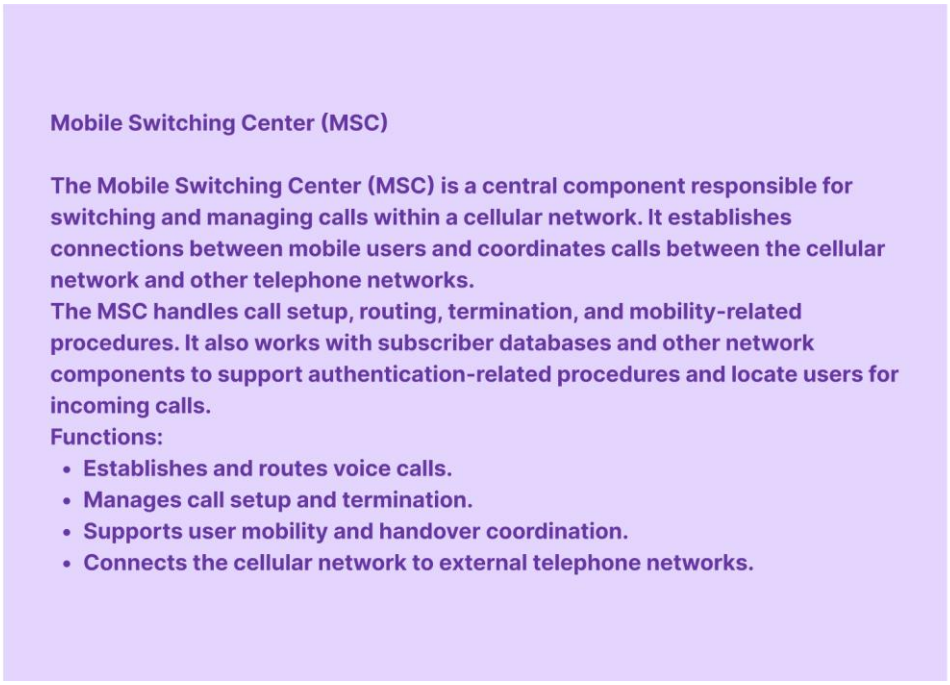

Output 3: Interactive Base Transceiver Station Overlay

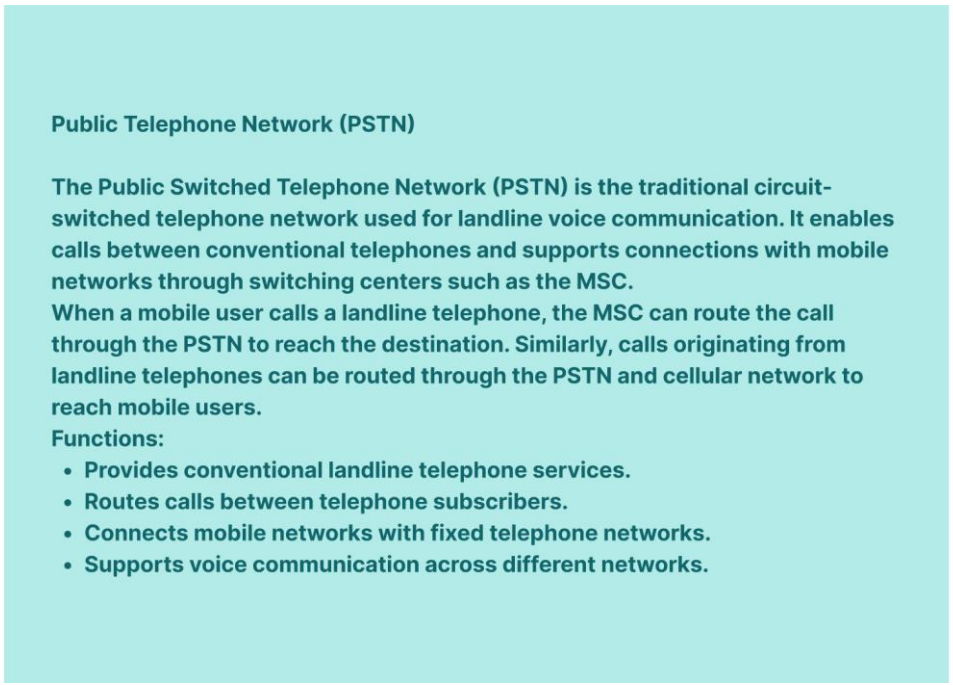

Output 4: Interactive Base Station Controller Overlay

Output 5: Interactive Mobile Switching Center Overlay

Output 6: Interactive Public Telephone Network Overlay

Result:

Hence, an interactive diagram illustrating the components of a basic cellular system was created successfully using Figma.
