LAB OBSERVATION

EXPERIMENT-6

6) Use Figma to simulate a handoff scenario in a mobile network and visualize the process

Answer)

Aim:

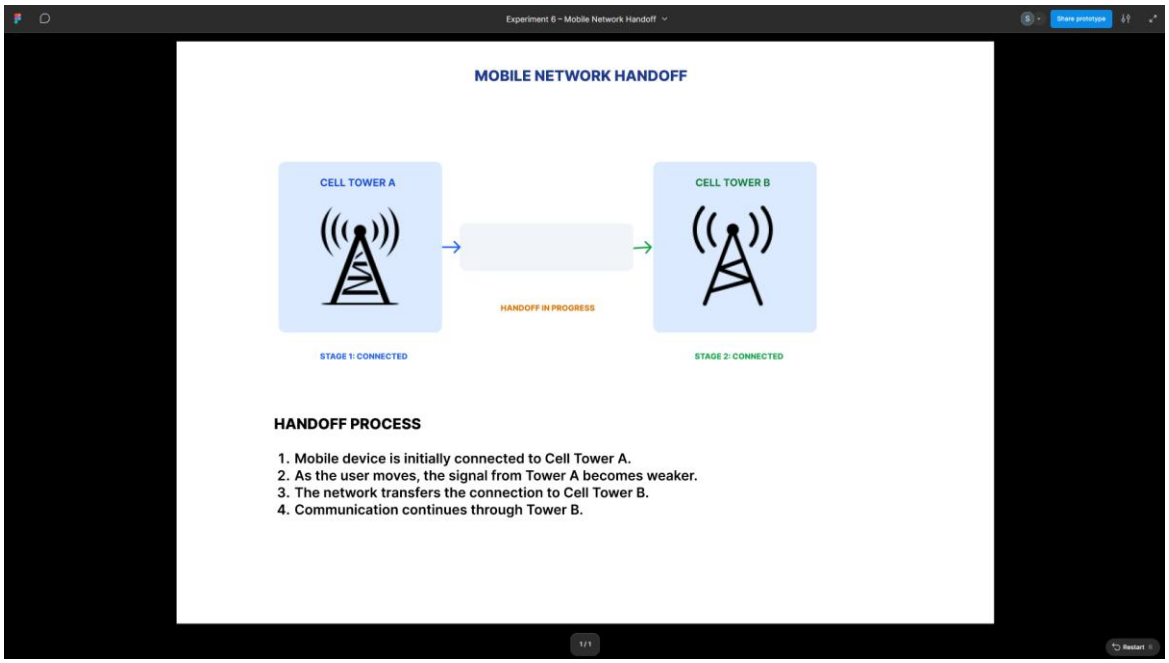

To simulate a handoff scenario in a mobile network and visualize the process using Figma.

Procedure / Algorithm:

1. Open Figma and create a new design file.
2. Create a Desktop frame for the handoff diagram.
3. Add a title, Mobile Network Handoff.
4. Create two cell tower areas and label them Cell Tower A and Cell Tower B.
5. Add a mobile device between the two towers.
6. Draw directional arrows to represent the connection transfer between the towers and the mobile device.
7. Add labels to indicate the initial connection, handoff in progress, and final connection.
8. Include a brief explanation of the handoff process.
9. Review the diagram, make necessary changes, and save the file.

Output:

A visual simulation of a mobile network handoff was created in Figma, showing two cell towers, a mobile device, directional arrows, connection stages, and the handoff process.

Result:

The mobile network handoff scenario was successfully simulated visually using Figma, illustrating the transfer of a mobile device's connection from Cell Tower A to Cell Tower B.
