LAB OBSERVATION

EXPERIMENT-4

4) Create a visual representation in Figma highlighting the key elements of mobile network protocol stacks.

Answer)

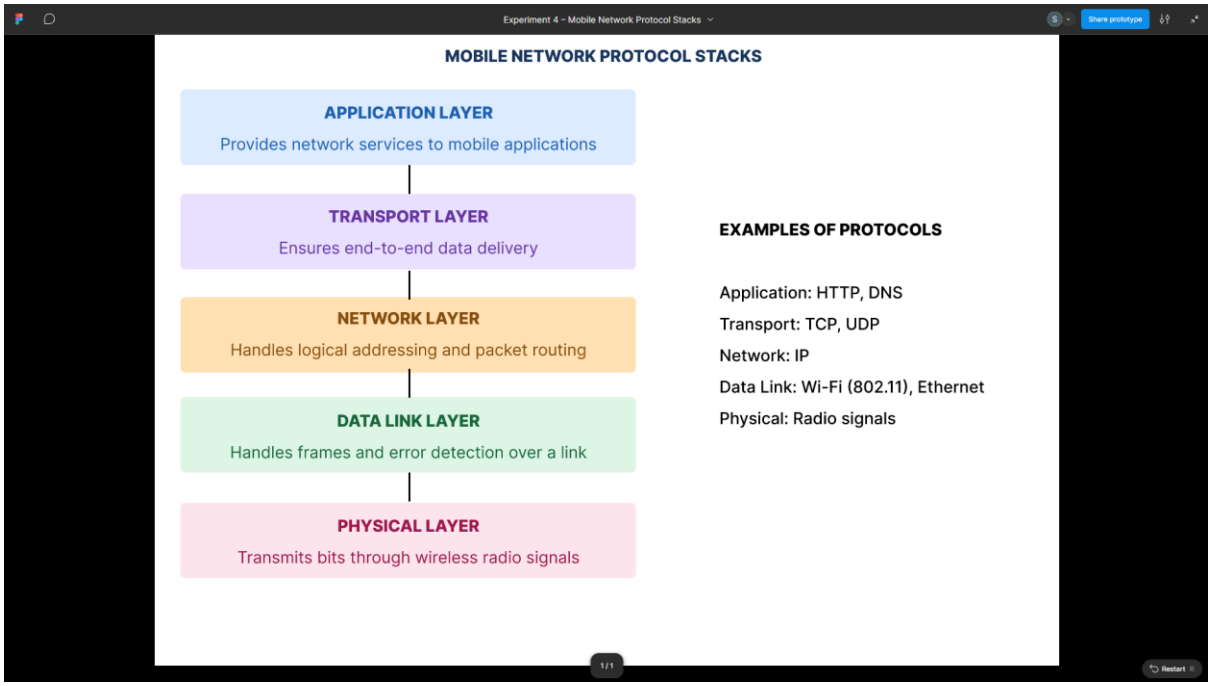

Aim:

To create a visual representation using Figma highlighting the key elements of mobile network protocol stacks and their functions.

Procedure / Algorithm:

1. Open Figma and create a new design file.
2. Create a frame and add the title Mobile Network Protocol Stacks.
3. Design separate rectangles to represent the five protocol layers: Application, Transport, Network, Data Link, and Physical.
4. Add a brief description of each layer.
5. Connect the layers using lines to illustrate their relationship.
6. Add examples of protocols associated with each layer.
7. Arrange the elements neatly using suitable colors, fonts, and spacing.
8. Review the design, make necessary corrections, and save the file.

Output:

Result:

The visual representation highlighting the key elements of mobile network protocol stacks was successfully created using Figma.
